

Coast Guard “People Pod”

Lighting supplier for Berg Manufacturing, project: US Coast Guard’s onboard “People Pod”.

Project required a bright white LED for main lighting in crew barracks, with the optional NVIS Blue for blackout mode. These lights are specially designed to allow for maximum head room in the very tight quarters. The operation with dual light colors within the smallest fixture possible was a distinct advantage for the LED Smart CWL-C series light.

Available in lengths of 12” - 48”, the CWL-C series can be applied to areas with small profiles and tight restrictions.
